

## JOHNNY MAC'S

John from Johnny Mac's arrived in Forster in June'13 to re-boot his bookkeeping & tax services business from a small home/office opposite Forster Bowling Club. He only bought a few Shire clients with him and plans to spend the next 30 years in paradise.

While recovering from hip surgery in Sydney in 2012 he "tripped" over Xero, an innovative NZ company offering beautiful accounting software in the cloud. Well, after 30 years of MYOB bookkeeping, this was a revelation. One login from desktop, iPad or mobile with major banks feeding transactions into the software has halved the workload. From the dashboard you get a "whole of business" view including bank balances, a cashflow graph, an account watchlist and outstanding debtors & creditors. Payroll is also included, if needed, in the full version.

John reckons a better option for small business and start-ups is the cashbook which excludes debtors, creditors & payroll. The GST & non-GST Cashbooks are available to bookkeepers/accountants only.

While John has established a small clientele in his 20 months in Forster he's still looking for more small business' to take the plunge and convert from MYOB to Xero bookkeeping. His fees are very reasonable. If you are one of these innovators contact John.
